At the heart of Mother & Child Care

Solutions for the NICU, PICU, well-baby nursery and the home

Go to overview

PHILIPS

sense and simplicity

Overview

Professional development

A broad portfolio of education offerings dedicated to help improve the quality of developmental outcomes for the most fragile infants.

Infant warming

Creating a warm, comfortable environment to ease the transition into the world for your tiniest preemies is made easier with ATOM incubators and infant warmers, part of the Philips portfolio.

Respiratory care

Featuring NeoPAP – advanced technology that sets a new standard for neonatal respiratory care.

Cardio-respiratory monitoring

Monitoring solutions to alert caregivers in the hospital and/ or home about significant events and providing valuable information to enhance care.

Jaundice management

Proven jaundice management solutions based on our developmentally friendly approach to treating newborns.

Feeding and safety

A complete portfolio of feeding products designed to support delivery of nutrition to each baby in the best way possible.

Sleep and positioning

Developmentally-appropriate sleep and positioning solutions that help support caregivers' efforts in caring for the most fragile infants.

Calming and soothing

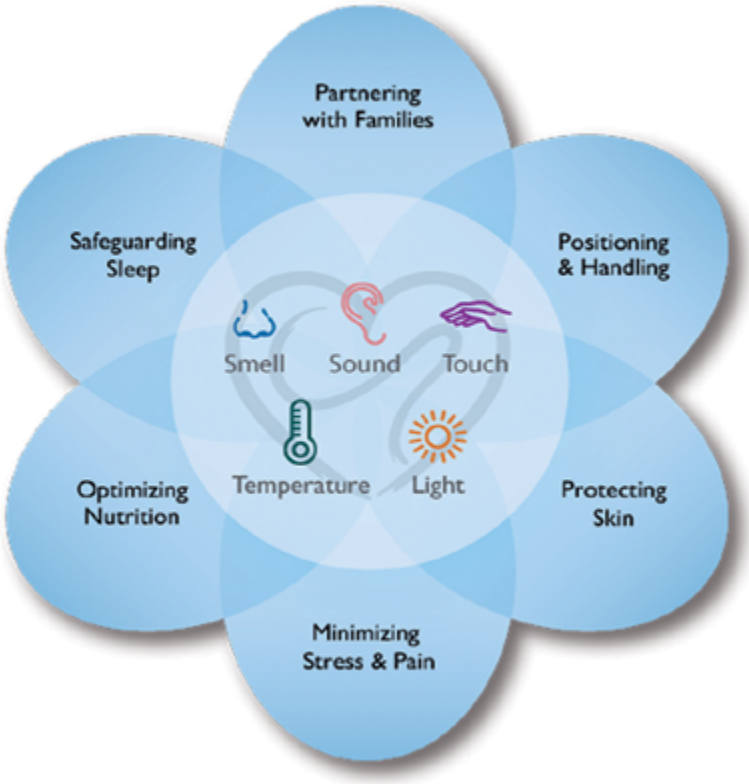
Innovative, evidence-based solutions designed to support a baby's growth, while helping newborns bond with parents and family.

Baby care

Easy-to-use products that help even the smallest babies be comfortable.

Please note: not all products and services are released for sale in all geographies.
If you are in doubt, please check with your Philips representative.

Integrative Developmental Care Model



The Integrative Developmental Care model is a new and simpler way to communicate about and teach Developmental Care. Based on the published Universe of Developmental Care (UDC)[1] and Core Measures literature[2], the overlapping petals of the model demonstrate the integrative nature of Developmental Care. The petals represent the Core Measures of Developmental Care and the center of the model represents elements of the Core Measure known as the healing environment, which incorporates the sensory system and the physical environment (smell, sound, touch, temperature and light). Items on the outside petals represent key factors that should be considered when caring for a patient, including: Partnering with Families, Positioning & Handling, Protecting Skin, Minimizing Stress & Pain, Optimizing Nutrition, and Safeguarding Sleep.

Our professional development programs focus on the Core Measures represented in the Integrative Developmental Care Model and help hospitals to implement customized quality improvement initiatives around those Core Measures selected by the institutions.

Professional development (Instructor-led Programs)

Preemie for a Day

This popular, interactive, multi-sensory training program contrasts the experience of an infant in a traditional NICU environment to that of an infant in a developmentally supportive NICU. The practice areas addressed are feeding, admission and transport, family and staff communication, and positioning.

Preemie for a Day
Product
Preemie for a Day – (2) 4-hour sessions

Cue-Based Feeding

Cue-Based Feeding, an innovative and comprehensive feeding program aimed at individualizing the feeding experience for infants in the NICU, introduces the learner to the long-term effects of disrupted infant feeding. Program content includes an introduction to the basics of feeding physiology, feeding skill development, and practical tips to provide family participation and success.

Cue-Based Feeding
Product
Cue-Based Feeding – 6-hour program

The Late Preterm Infant

This comprehensive program will share insights relating to the complexity of the late preterm infant and provide caregivers with a better understanding of the hidden challenges these infants face.
Topics covered include identifying risk for complications, recognizing the differences between the preterm, late preterm and the full-term infant, fostering developmentally supportive care, and accessing appropriate strategies for caring for late preterm infants.

The Late Preterm Infant
Product
The Late Preterm Infant – (2) 4-hour sessions

Global Wee Care

This customized program is an internationally recognized consultative program that transforms care through quality improvement methodology and is aimed at standardizing developmentally supportive care practices in the NICU.
This program combines evidence-based best practices with Core Measures for developmentally supportive and family centered care to provide a full Developmental Care education solution in your unit. This program lays the foundation for success through leadership skills training focused on conflict resolution, communication strategies, and accountability principles.

Professional development (CD-ROM Interactive Learning Modules)

Focus on the Brain, Part 1

The Science of Preterm Infant Development presents a practical overview of research illuminating the process of fetal and neonatal development. Using animations and commentary from leading experts in the field, this DVD conveys what is now known about the impact of early birth on the brain and how to support optimal brain growth.

Focus on the Brain, Part 1

Product	Quantity per Case	Legacy / New Product No.
Focus on the Brain, Part 1	1	1044284 / 989805605261

Focus on the Brain, Part 2

Clinical Practices for Special Care Nurseries incorporates the science presented in Part 1 of the series and gives professionals who work in special care nurseries practical and proven strategies to support optimal brain development in preterm infants.

Focus on the Brain, Part 2

Product	Quantity per Case	Legacy / New Product No.
Focus on the Brain, Part 2	1	1044285 / 989805605271

No Matter How Small

No Matter How Small is a parent's guide to preterm infant development and behavior. Utilizing current research, this program shows parents how they can help support the normal growth and development of their baby's brain and is available to both NICUs and parents.

No Matter How Small

Birth to Breast – Feeding Care Maps for the NICU	1	1039667 / 989805605091

Kangaroo Care – Positive Touch in the NICU

The benefits of kangaroo care (skin-to-skin contact) have been well documented, prompting the World Health Organization to recommend that skin-to-skin care be available in all neonatal environments. Benefits detailed in this module range from cardiorespiratory stability, protected thermoregulation, better sleep patterns, and decreased hospital stay.

Parenting Based on the Developmental Progression of Preterm Infants

This evidence based booklet is designed to help parents understand and participate in the care of their baby. Written by medical staff at the University of Southern Mississippi, the booklet is organized by gestational age, describing general development, goals and ways to actively parent a baby through age-appropriate touching and holding, feeding, sleeping, positioning, diapering and bathing.

ATOM Dual Incu i Model 100

The Dual Incu i combines the stable irradiance of an open-care warmer with the therapeutic environment of a closed incubator. State-of-the-art performance gives you flexibility for use in the NICU and a range of other care settings. The Dual Incu i includes double-latch access doors, gentle-drop panels, independent X-ray tray access doors, the ability to go lovingly low, and a curtain of air to prevent ambient air from entering the capsule.

ATOM Dual Incu i Model 100 The Dual Incu i provides a therapeutic environment at just 41dBA to support Developmental Care goals.

ATOM Incu i Model 101

The Incu i incubator offers a developmentally beneficial environment that supports even the smallest micropreemie with state-of-the-art performance. It performs at approximately 41 dBA without humidification and approximately 44 dBA with humidification. The Dual Incu i includes double-latch access doors, gentle-drop panels, independent X-ray tray access doors, the ability to go lovingly low, and a curtain of air to prevent ambient air from entering the capsule and boasts a clear display with large numerical values and intuitive touch control for easy access to information.

ATOM Incu i Model 101 The Incu i incubator helps to provide exceptional developmentally supportive care for the infant while allowing for flexibility for the caregiver.

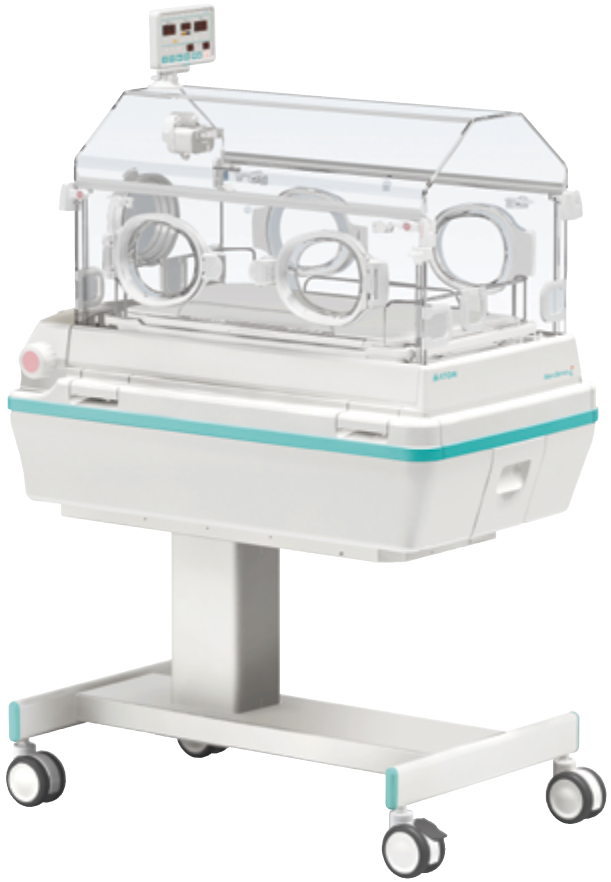
ATOM Rabee Incu i Model 102

The Model 102 incubator offers calm and quiet to your youngest patients. Unique side access through gentle-drop doors helps leave the infant unperturbed, while a curtain of air helps maintain consistent temperature in the incubator. Components, including the humidifier, are easy to detach and easy to clean. Check and change the electrostatic filter with no tools required. Moveable screen is convenient to position. Adjust the gentle-tilt mattress without the need to open the incubator.



Please note: not all products and services are released for sale in all geographies.

V808 Transcapsule

The Transcapsule transport incubator provides a stable environment across a range of transport situations. Ergonomic advances and Masimo® pulse oximetry give you performance that you and your tiny patients can depend upon. Features include padded handle with ergonomic design height and a digital display of skin temperature and oxygen concentration. A head-end door tray provides access for reintubation or repositioning.

V808 Transcapsule The V808 Transcapsule has an advanced design that supports organized care for the infant in a calm and comfortable environment.

NeoPAP System and Accessories

NeoPAP is a sophisticated nasal CPAP delivery and treatment system developed to treat newborns and infants up to 5kg with respiratory distress syndrome (RDS) or who are recovering from RDS. The NeoPAP patient interface's small profile and ability to be used with both CPAP and Flow modes gives you the freedom to accommodate the unique care needs of your smallest patients. Key advantages include a lightweight patient interface, adjustable alarm control, and Baby-Trak leak compensation technology, elminating the need for a closely fitted interface seal and helping to reduce pressure on the patient's face and nose.

NeoPAP System and Accessories

Three modes of therapy are available to meet the unique care needs of your patients – CPAP mode, Flow mode, and Resuscitation mode.

BBG Nasal Aspirator / Bulb-Style Nasal Aspirator

BBG Nasal Aspirator

Developed in collaboration with clinicians, the BBG nasal aspirator offers a noninvasive suction alternative of the nasal cavity for newborns, infants and children. Two flexible sizes provide suction and a bulb-shaped interface provides an easy seal at the nare to protect the fragile nasal mucosa.

BBG Nasal Aspirator

BBG's versatility makes it ideal for the NICU, PICU, delivery room, emergency room and general pediatrics.

Product	Quantity per Case	Legacy / New Product No.
BBG Nasal Aspirator 4.5" length	50	93032-S / 989805606961
BBG Nasal Aspirator 3.25" length	50	93032-02 / 989805606951

Bulb-Style Nasal Aspirator

This aspirator provides gentle suction to remove excess mucus or secretions from a baby's nasal passage. The First Years® bulb-style aspirator, an officially-licensed product of the American Red Cross, features an over-insertion guard and a pull out plug that allows thorough cleaning.

Bulb-Style Nasal Aspirator

Philips Children's Medical Ventures is pleased to be the exclusive provider of this pediatrician-approved nasal aspirator to hospitals.

Product	Quantity per Case	Legacy / New Product No.

NEO-POD T

NEO-POD T is Philips first, active, single-patient-use humidification system for a wide variety of ventilators and transfer situations. Lavabed pass-through humidification technology provides highly saturated gas to be delivered to the patient while a compact, lightweight design makes NEO-POD T ideal for transport environments with space and weight constraints. It is compatible with the 12V battery/power management system of nearly every type of transport ventilator/incubator combination.

Please note: not all products and services are released for sale in all geographies.
If you are in doubt, please check with your Philips representative.

SmartMonitor 2 Apnea Monitor – Home monitoring for the smallest of infants

Monitoring heart and respiration activity at home. 2 MB of memory. Uses an alarm alert and a symbol-based interface. Remote access to data downloads and online real-time viewing by clinicians is available when using the optional integral modem.

SmartMonitor 2 Apnea Monitor – Home monitoring for the smallest of infants

- Small, light design facilitates easier transport
- Straightforward symbol platform reduces inventory and simplifies training
- Metal patient cable and connector improve durability
- 2 MB of memory capacity holds hundreds of events
- Internal modem allows for remote downloading

BiliChek noninvasive bilirubin assessment tool

Using light instead of a needle, BiliChek allows you to test bilirubin levels without a blood sample. Only the individual calibration tip touches the baby. Used for testing at the baby's forehead or sternum, this innovative hand held unit gives instant results that allow you to make immediate treatment decisions. BiliChek can be used before, during and after phototherapy, making it ideal for the newborn nursery and the NICU.

BiliChek noninvasive bilirubin assessment tool

Clinically proven, BiliChek virtually eliminates the costs and time associated with blood draws and laboratory services.

Wee Sight transilluminator / Oral/Enteral Only syringes

Wee Sight transilluminator

The Wee Sight transilluminator can help to accurately locate the tiny veins in a neonate's small limbs for improved insertion of an IV. The strong LED light does not emit heat.

Wee Sight transilluminator Uses two AA alkaline batteries (included), is a Class 2 LED product, and has an output light wave length of 629 nm.		
Product	**Quantity per Case**	**Legacy / New Product No.**
Wee Sight transilluminator	1	1017920 / 989805603761

Oral/Enteral Only syringes

Oral/Enteral syringes come in seven different sizes with safety features that include highly visible labeling that reads "ORAL/ENTERAL ONLY," a bright orange plunger that immediately distinguishes it from medication syringes, and a syringe tip that will not securely attach to a standard luer lock connector.

Oral/Enteral Only syringes Recognized in the Smiths Medical Medfusion 3500 syringe pumps with PharmGuard v5 software, syringes are sterile and packaged individually, with barcode labeling.

Enteral Only extension sets

Enteral Only extension sets

Enteral Only extension sets are designed to help reduce the potential for inadvertent delivery of enteral feedings through the intravenous route. The distinctive safety tip connects easily to nasogastric (NG) tubes and enteral lines, but is NOT compatible with IV tubing or stopcocks. Our Enteral Only extension sets are also available with an oral adapter that easily accepts an oral dose syringe.

Enteral Only extension sets Enteral Only extension sets are made from Minibore (.047) PVC tubing and are not manufactured with Natural Rubber Latex and DEHP.		
Product	**Quantity per Case**	**Legacy / New Product No.**
60” extension set – priming volume approximately 1.8 ml	50	95017-A / 989805607021

Polyurethane feeding tubes / SafeFeed Reservoir

Polyurethane feeding tubes

These soft, smooth polyurethane tubes are designed with rounded, open ends and can be easily and securely connected to our extension sets and oral/enteral syringes to provide an end-to-end enteral feeding solution.

Polyurethane feeding tubes

Feeding tubes include orange radiopaque stripe, easy to open and clean cap, and calibration markings at 1cm intervals to help confirm placement.

SafeFeed Reservoir

This all-in-one collection, transport, storage, preparation, and delivery device is part syringe and part bottle to help ease the transition from enteral to oral feeding. The SafeFeed Reservoir is a universal container for breast milk or formula and can attach directly to the feeding tube or extension set for enteral feeding with no need for additional syringes.

SafeFeed Reservoir

SafeFeed is an all-in-one feeding device that provides workflow efficiency and less chance of spilling and contamination.

Safe-T-Care infusion sets / Trifurcated extension set

Safe-T-Care infusion sets

Safe-T-Care infusion sets were developed in response to specific requests by clinicians to provide a cost-effective system for IV fluid delivery. The sets allow the caregiver to administer any type of IV solution, medication, lipids and/or other fluids in a closed system.

Safe-T-Care infusion sets

Safe-T-Care infusion sets come in sterile packaging and are available in two sizes and with or without a filter.

Product	Quantity per Case	Legacy / New Product No.
60" x .020 Patient Line – priming volume 0.5cc (ml)	25	92062-A / 989805606651
60" x .44" Patient Line with .2 Micron filter – priming volume 2.0cc (ml)	50	92062-H / 989805606661

Trifurcated extension set

The Trifurcated extension set was developed for use with both volumetric and syringe pumps in response to the clinical challenge of limited IV access in critically-ill infants. It offers convenience and flexibility by allowing caregivers to administer up to three fluids. It is ideal for specialty applications including cardiac medications, multiple antibiotics, pre- and post-op medications and continuous insulin infusions.

Trifurcated extension set

Trifurcated extension sets can be used for standard maintenance fluids, medications, flush, TPN and intralipids.

Product	Quantity per Case	Legacy / New Product No.
Trifurcated extension set – 4.5" Minibore Patient Line – .044" ID – .2 Micron filter – priming volume .7cc (ml)	50	92062-1100 / 989805606641

Specialty feeding products by Pigeon

The cleft palate nipple is specially designed to feed cleft palate infants and infants with poor sucking strength. The Y-cut nipple has a thick and thin sidewall with a one-way valve that prevents excessive air intake and allows milk to flow only when sucked by the baby. Not manufactured with Latex.

Specialty feeding products by Pigeon

The Pigeon food feeder bottle is a 120 ml squeezable bottle with an attached spoon to assist with weaning or to use with problem feeders.

Product	Quantity per Case	Legacy / New Product No.
Food feeder bottle	1	98072 / 989805603351

SnuggleUp

The SnuggleUp is a soft, cozy nest that helps to provide proper positioning and physiological stability for preterm and ill babies. The padded footroll angled to provide foot bracing and the soft, adjustable straps allow movement while gently maintaining developmentally supportive midline, flexed, and contained positioning.

SnuggleUp SnuggleUps are made from a soft, washable cotton/polyester interlock knit that can be washed and reused.

Cozycare Bunting / Prone Plus

Cozycare Bunting

Used to help reduce heat loss and provide containment in the delivery room, nursery, during transport or feeding, and at home.

Cozycare Bunting – thermal wrap

Made from ultra-soft, 100% polyester, non-allergenic, non-toxic, flame retardant, non-woven material with a layer of DuPont™ Thermolite®.

Product	Quantity per Case	Legacy / New Product No.
For micro preemie < 3 lbs	25	93019-C / 989805606871
For preemie 3-6 lbs	25	93019-B / 989805606861
Newborn 5-10 lbs	25	93019-A / 989805606851

Prone Plus

The Prone Plus utilizes the natural force of gravity to assist in proper prone positioning and ventral support for hospitalized infants.
The memory foam elevates the infant's upper body to promote flexion without placing excessive pressure on the knees and elbows.

Prone Plus

Provides standard and consistent prone support while helping to maintain a secure, balanced and flexed position.

Product	Quantity per Case	Legacy / New Product No.

Swaddle Cloth / Developmental Positioning Packs

Swaddle Cloth

The Swaddle Cloth promotes effective swaddled bathing, which results in decreased physiological and motor stress for the infant, and builds parents' confidence in handling their baby. Its triangular piece of soft fabric with a deep pocket offers a secure way to promote containment during the swaddled bath.

Swaddle Cloth

Squishon 2 and 3 / Squishon Mattress

Squishon 2 and 3

Provides an exceptionally soft, pliable surface to support and cradle a baby's head and/or body. The rectangular shape allows for head movement while maintaining a supportive surface and provides an effective ventral support for prone positioning. Made from a soft, breathable material and filled with a non-toxic gel.

Squishon 2 and 3 – versatile gel-filled cushions

Squishon 2 to support the extremely low birth weight infant. Squishon 3 for older preemies and babies with more resilient skin.

Product	Quantity per Case	Legacy / New Product No.
Squishon 2 (6 x 9)	12	91033-2 / 989805606441
Squishon 3 (6 x 9)	12	91033-3 / 989805606461
Disposable covers	50	91033-A / 989805606481

Squishon Mattress

Non-toxic, gel-filled mattress provides a soft surface that was designed to help relieve pressure points, protect fragile skin and encourage proper positioning. Caregivers can reposition the baby and shift pressure points without having to handle the infant.

Squishon Mattress – pliable gel-filled mattress

Product	Quantity per Case	Legacy / New Product No.
Squishon mattress (12" x 22")	1	91017 / 989805603301
Disposable covers	25	91017-A / 989805606321

Please note: not all products and services are released for sale in all geographies.
If you are in doubt, please check with your Philips representative.

Wedgie / Gel-E Donut

Wedgie

A cushion filled with a non-toxic gel that provides flexible yet stable support for all positioning needs. It can be used to shift pressure points, increase baby's comfort level and support an infant's ventilator circuit.

Wedgie – gel-filled infant positioning aid		
Product	**Quantity per Case**	**Legacy / New Product No.**
Wedgie - 3" x 4" x 5"	12	91014 / 989805603291
Disposable covers	50	91033-A / 989805606481

Gel-E Donut

A non-toxic, gel-filled positioning product that helps alleviate pressure caused by prolonged immobility or other conditions where frequent repositioning is contraindicated.

Gel-E Donut – soft gel pillow The extremely soft outer bag, combined with the unique gel formulation, provides a soft, supportive surface.		
Product	**Quantity per Case**	**Legacy / New Product No.**

Infatherm Transport Mattress

The Infatherm warming gel mattress is designed to gently support an infant's entire body. In the NICU, nursery, delivery room, ER and OR, it is used to provide relief at pressure points and assist in maintaining a neutral thermal environment.

Infatherm Transport Mattress – disposable transport mattress with warming gel

When activated, the gel solution heats to 105°F/41°C, providing necessary thermoregulation.
An infant can lie directly on its soft, non-slip fabric.

Wee Thumbie

The Wee Thumbie is one of the first pacifiers designed specifically for use by very low birth weight babies and modeled after the size and shape of the preemie thumb, facilitating the important sucking behaviors normally learned in utero. The Wee Thumbie is not manufactured with DEHP or Natural Rubber Latex.

Wee Thumbie For babies <30 weeks gestation; for hospital use only		
Product	**Quantity per Case**	**Legacy / New Product No.**
Wee Thumbie, Aqua	100	1046741 / 989805605381
Wee Thumbie, Purple	100	1046742 / 989805605391

Wee Soothie

The Wee Soothie provides a superb fit for growing preemies or smaller term babies during their hospital stay. The notched area alows space for CPAP tubing, mechanical ventilation, or tube feeding. Our Wee Soothie pacifier is not manufactured with BPA, DEHP or Natural Rubber Latex.

Wee Soothie For babies 30-34 weeks gestation; for hospital use only

Please note: not all products and services are released for sale in all geographies.
If you are in doubt, please check with your Philips representative.

NICU Soothie

The NICU Soothie is a premium pacifier designed for newborns and babies up to 3 months old without teeth who are successfully breast or bottle feeding. The notched area allows for CPAP tubing, mechanical ventilation or tube feeding. The NICU Soothie is not manufactured with BPA, DEHP or Natural Rubber Latex.

Please note: not all products and services are released for sale in all geographies.
If you are in doubt, please check with your Philips representative.

Super Soothie

Similar to Soothie, the Super Soothie is not manufactured with DEHP or Natural Rubber Latex. Its one-piece construction adheres to AAP guidelines.

Super Soothie For babies with teeth; for hospital or home use		
Product	**Quantity per Case**	**Legacy / New Product No.**
Super Soothie, Pink (natural)	100	1031640 / 989805604751
Super Soothie, Blue (natural)	100	1031639 / 989805604741

WubbaNub

WubbaNub infant pacifiers are specially designed for babies 0-3 months without teeth to keep the Soothie pacifier conveniently placed while monitored in the hospital. At home, while awake, the WubbaNub is easy to grasp for the infant, helping the baby bring hands to midline and can eliminate the use of a pacifier clip or cord.

WubbaNub Pacifier with plush animal for babies without teeth; for hospital or home use		
Product	**Quantity per Case**	**Legacy / New Product No.**
WubbaNub dog	12	99011-01 / 989805607571
WubbaNub duck	12	99011-02 / 989805607581

WubbaNub penguin	12	1059278 / 989805605971

Please note: not all products and services are released for sale in all geographies.
If you are in doubt, please check with your Philips representative.

Sweet-Ease

Sweet-Ease is an all-natural 24% sucrose and purified water solution that helps calm and soothe babies up to six months of age. It is aseptically packaged in a 15ml cup with a peel-off lid that is suitable for dipping a pacifier or for administration via a dropper or syringe.

Sweet-Ease Sweet-Ease pure and simple calming and soothing solution		
Product	**Quantity per Case**	**Legacy / New Product No.**
Sweet-Ease Natural (15ml cup)*	200	99044 / 989805603401

*Has a two 1 year shelf life from the date of manufacture

Sweet-Ease 2mL Vial

Sweet-Ease is an all-natural 24% sucrose solution which helps calm and soothe babies up to six months of age. This 2ml sterile vial includes 1D and 2D barcode stickers and simplifies clinician workflow with fewer steps and less clean-up.

Sweet-Ease 2ml Vial		
Product	**Quantity per Case**	**Legacy / New Product No.**
Sweet-Ease Natural (2mL Vial)*	96	1093977 / 989805637451
Sweet-Ease Natural 2mL Vial Sample Pack*	8	1094150 / 989805637461

*Has a two 2 year shelf life from the date of manufacture

Please note: not all products and services are released for sale in all geographies.
If you are in doubt, please check with your Philips representative.

Sweet-Heart

The Sweet-Heart holder is designed to snugly hold the Sweet-Ease cup and to prevent it from tipping. The Sweet-Heart is made from closed-cell foam that can be easily cleaned and disinfected with standard hospital solutions.

Sweet-Heart		
Product	**Quantity per Case**	**Legacy / New Product No.**
Sweet-Heart	1	1023770 / 989805604241

Snoedel

The Snoedel, originating from a Dutch family tradition, offers parents a means to comfort and bond with their child even when the baby is in the hospital. The pure sheep wool incorporated into the high quality flannel doll absorbs the parents' scent and slowly releases it, supporting the sensitive olfactory system of the infant.

Snoedel Snoedel flannel doll and bonding aid		
Product	**Quantity per Case**	**Legacy / New Product No.**
Snoedel (6 blue/6 pink)	12	96029 / 989805603331
Snoedel (12 unisex print)	12	96029-B / 989805607221

WeePee diapers / Pee-on absorbent underpad

WeePee diapers

WeePee diapers are specifically designed for premature infants to provide the right fit as well as comfort. The highly absorbent rectangular pad as well as the soft, flexible, non-adhesive closure system promotes developmentally appropriate positioning.

WeePee diapers

Three sizes for a custom, comfortable fit in color-coded packaging to differentiate sizes at a glance.

Product	Quantity per Case	Legacy / New Product No.
Extra Small <800g	360*	1017824 / 989805603721
Small 800-1250g	360*	1017855 / 989805616941
Medium 1250-2250g	360*	1017856 / 989805603741

*30 diapers per sleeve; 12 sleeves per case

Pee-on absorbent underpad

The Pee-on is a 10" x 14" non-allergenic, non-toxic, appropriately-sized disposable underpad that helps to protect linens from urine, blood, and spills. It can be used as a mattress protector or with all SnuggleUp positioning aids.

Pee-on absorbent underpad

Product	Quantity per Case	Legacy / New Product No.
Pee-on	600	97047-B / 989805607451

Please note: not all products and services are released for sale in all geographies.
If you are in doubt, please check with your Philips representative.

Sali-Wipes / Heel Snuggler

Sali-Wipes

Sali-Wipes sterile saline (isotonic) wipes come in convenient foil packs. Nursing organizations recommend use of sterile isotonic saline for cleansing, as alcohol wipes can be damaging to fragile infant skin and may be absorbed into the bloodstream.

Sali-Wipes Sterile saline wipes		
Product	**Quantity per Case**	**Legacy / New Product No.**
Sali-Wipes (3" x 4")	576*	98098-013 / 989805607531

*24 boxes of 24 per case

Heel Snuggler

The Heel Snuggler is the only infant heel warmer designed to truly conform to the infant's heel while staying firmly in place without skin adhesives. The unique design is shaped like a butterfly with two soft, perforated straps for a comfortable and secure fit.

Heel Snuggler Infant Heel Warmer		
Product	**Quantity per Case**	**Legacy / New Product No.**
Heel Snuggler	100*	99047 / 989805603411

*25 per box; 4 boxes per case

Please note: not all products and services are released for sale in all geographies.
If you are in doubt, please check with your Philips representative.

Wee Warmer

This easy-to-use infant heel warmer provides steady warming without skin adhesives or wet wash towels. The temperature of this heel warmer is dependable during each use providing consistency for the heel stick procedure.

Wee Warmer Wee Warmer infant heel warmer		
Product	**Quantity per Case**	**Legacy / New Product No.**
Wee Warmer	100	1223 / 989805603201

Temperature Trend Indicators

Temperature Trend Indicators provide rapid, accurate temperature information noninvasively for consistent thermoregulation monitoring of patients. They are carefully adjusted to core-body temperature to provide accurate measurement.

Temperature Trend Indicators		
Product	**Quantity per Case**	**Legacy / New Product No.**
LC Accu-Bar Temperature Trend Indicator and dispenser box (one degree thermometer) 94F-105F	100	LC105D / 989805623001
Temperature Trend Indicator (two degree thermometer) 92F-104F	100	92104D / 989805622101
Temperature Trend Indicator and dispenser box (two degree thermometer) 86F-106F	100	86106D / 989805622091
